

**American University Neighborhood Partnership  
Steering Committee Meeting Summary**

March 24, 2020

Key Discussion Points:

- Facilities Planning Working Group Report-Out
- Enrollment Discussion

Summary: The March Steering Committee meeting began by looking at draft revisions to potential development sites based on neighborhood feedback from the Facilities Planning Working Group meeting. The neighbors' leaders also included a list of their comments on various identified building sites for AU to take into consideration. Next, there was a discussion about the types of “objectionable impacts” any further building plans may have on the nearby community, and how best AU can prepare for these types of issues. The Steering Committee members also discussed at length the methodology of AU’s enrollment numbers. The meeting closed out by looking at key upcoming dates for the Neighborhood Partnership.
