

**American University Neighborhood Partnership  
Transportation and Parking Working Group Summary**  
May 21, 2019

Key Discussion Points:

- Foundational Agreements
- Future Meeting Topics and Logistics

Summary: The first Transportation and Parking Working Group meeting started with an introduction to the consensus-based framework of the AU Neighborhood Partnership and the Terms of Reference document. AU representatives took questions about the scope of properties included in the upcoming campus plan, the level of confidentiality required for participation in the working group, and how to recruit new working group members into the Partnership. The group then looked ahead at the planned Transportation Management Program which examines the statistical info, mode-split, and zoning requirements for this part of the campus planning process. This includes looking back at the 2011 Campus Plan and finding areas that could be improved upon going forward.
