

## How to retrieve SET data for files for action Fall 2024

Your new files for action reports are available to provide easily updated and on-demand reports for all faculty.

The 4Year Longitudinal report includes all SET data from the Summer 2020 semester to the present. The 3Year Longitudinal report includes all SET data from the Summer 2021 semester to the present.

Only semesters using the current SET questions and scale are included in longitudinal reports. By Spring 2026, a 6-year longitudinal report will be available.

It is not necessary to create a longitudinal report with SET data prior to Summer 2020. Instructor Semester Summary reports are sufficient as they are. The only SET data necessary to be in longitudinal form are reflected in the longitudinal reports.

All faculty are required to upload the Department 4-year Longitudinal SET report also found in your Blue account. These reports reflect the combined SET results of other full-time faculty in your department. Department medians for terms prior to Summer 2020 can be found on the Instructor Semester Summaries already required to include in your files for action package.

**To retrieve student responses to open-ended questions, open your Instructor-Course PRIVATE reports in your Blue account. Copy and paste comments from there.**

**If you require three years** of SET data, download the Instructor Longitudinal 3Y SET report 2021F-2024X.

**If you require more than 4 years** of SET data, please follow the instructions below.

[Navigate to set.american.edu to access your Blue account.](https://set.american.edu)

On your landing page, scroll down until you see “Reports”

Look for the Instructor Longitudinal 4Y SET report 2020X-2024X and download.
